2.2. Main section of report

It was a challenge to capture good and fitting photos. Eventually, the idea of symmetry came to mind. It looks nice and is fitting to the theme of the site. I used the rule of thirds and symmetry in my photos. It is in the overall concept of elegance.
I also tried to create a feeling/atmosphere with the picture. Playing with patos. The goal is that the pictures creates a feeling in the person, or can think of how the atmosphere of the room is. That is why the pictures does not say much, but rather invoke thoughts in a buyer.
